

Hussein Muthanna Dakheel

Full-Stack Developer | TypeScript | Next.js | n8n Automation
Basra, Iraq (Remote) | me.nexadigital.dev | devhussain90@email.com | +964773841149

ABOUT

Self-taught Full-Stack Developer with a strong TypeScript foundation and a portfolio of self-built, deployed projects. Currently studying Business Administration (Year 3), bringing a cross-disciplinary perspective to engineering and product quality. Experienced building Next.js applications, automating workflows with n8n, and working with Git/GitHub in real development cycles. Detail-oriented with a curiosity-driven approach to finding edge cases and product weaknesses.

TECHNICAL SKILLS

Languages	TypeScript · JavaScript
Frontend	Next.js · React · Tailwind CSS · HTML5 / CSS3
Backend	Node.js · REST APIs · Server Actions
AI & Agents Engineering	Antigravity · Multi-Agent Systems · LLM Orchestration (Gemini, Claude) TypeScript · Prompt Engineering · Function Calling · API Integration
Tools	Git · GitHub · Vercel · VS Code · Linux CLI
Other	Microsoft Word · Excel (Intermediate) · Arabic (Native) · English (Intermediate)

PROJECTS

Portfolio / Agency Site <i>me.nexadigital.dev Next.js · TypeScript · Tailwind · Vercel</i> - Production-deployed with custom domain, responsive design, and dark/light theming. - App Router architecture with Vercel CI/CD pipeline.	AI Autonomous Agents System • Developed multi-agent workflows using Antigravity, leveraging Claude for reasoning and Gemini for multimodal processing. • Implemented Function Calling and tool-use to allow agents to interact with external APIs and perform real-time data analysis. • Optimized agent prompts to reduce hallucinations and improve the quality of output in automated testing scenarios. •
